SUMMARY

I'm specialized in crafting delightful, scalable, simple, standard compliant and lightweight Web based UI solutions using truly full stack skills, vision and knowledge from the field of **UX, UI, frontend architecture, design system, SEO, semantic content, developer experience, CI/CD, serverless, web assembly and decentralised web**. I have over **14+ years** of relevant experience. I currently work in “**Come On Stockholm AB**” as a **Frontend Lead** in **Stockholm, Sweden**.

I explore the depth of possibilities for my contributions. I'm passionate about creating Web based solutions that are both Usable and Accessible without compromising aesthetics. These ideals are realized by closely following modern development semantics, standards, best practices and creativity, in a pragmatic way.

I have acquired expertise in buzzing technologies e.g, Deno, Node JS, Typescript, SvelteJS, React JS, CI / CD (Gitlab CI/ Github Actions etc), Docker, Edge Platforms (Cloudflare workers), Google Cloud. I can find my way in Figma, Python and Prolog as well. I am learning Rust and Go with context of their support of web assembly.

I prefer to work with **Serverless architecture** using Svelte, Figma, Web Assembly, Rust, Deno, Cloudflare Workers and Google Cloud Run. For distributed web development I prefer Hypercore/Dat protocol, IPFS, ETH and Near protocol. I am obsessed with optimization for web delivery and that has been

EDUCATION

Bachelor of Information
Technology
— IGNOU 2008

BTEC Higher National Diploma
— IGNOU & London
Qualifications Ltd. 2006

my area of exploration lately. In recent years I've been involved with application/API architectures, which are focused on performance and paradigms which try to optimise bundling & resource delivery of web apps.

I am of the opinion that the web is ripe for early adopters with many tools under its belt to offer to developers. Optimal use and pioneer adoption of technologies i.e. Web Components, Web Assembly, Typing System and (Web / Service) Workers will define victors of the next decade.

I am closely following multidimensional development around web platforms and I am a believer.

EXPERIENCE

Frontend Lead, Come On Stockholm AB

Stockholm, Sweden — May 2016 - Current

Working as a frontend lead in Comeon AB. Architecting / developing a variety of web applications. My core responsibilities involve developing performant web applications which deliver immersive experience to its users.

Highlights and accomplishments

- Lead a team of 8 frontend developers.
- Creating a Design System which aims to solve complex delivery systems for 14 brands.
- Created System Design architecture for immutable Gitops
- Upgraded project AMD JS code base to ES modules.
- Smoothened build process.
- Optimized performance of Javascript on project
- Introduced CI/CD of frontend resources
- Introduced differential loading of Javascript based on browser capabilities.
- Helped migrate web applications to components based architecture
- Improved tooling for developer experience of teams.
- Utilising serverless approach whereas applicable

Project Lead, L&T Infotech

SKILLS

- HTML 5
- CSS 3
- Javascript / ES6
- React
- Redux
- Rollup
- Webpack
- Node JS
- Deno
- Responsive Design
- UX & Typography
- SASS
- GIT
- Svelte
- Web Assembly
- Rust
- Progressive Web Apps
- Serverless
- Google Cloud Platform
- Cloudflare Workers

SOFT SKILLS

- Fluent knowledge of verbal and written English and Hindi languages.

Södertälje, Stockholm, Sweden — October 2015 - April 2016

Working as a frontend consultant for Scania AB. Architecting / Developing a React / Redux web app.

Highlights and accomplishments

- Re-architected an app which is a pain point for business in terms of performance and usability.

Senior Associate L2 Track Lead, Sapient

Bangalore, India— April 2014 - October 2015

Working as a Track lead for front end web developer my responsibilities include but not limited to develop rich web applications and project coordination with stakeholders and peer developers.

Highlights and accomplishments

- Develop rich web applications using HTML5, CSS3, Javascript, Node JS and AngularJS
- Analyse and decide on technology stack and front end framework for use case.
- Estimate and execute project plan.
- Ensure development is done with finest technology and programming feasible.
- Code review to ensure performance and readability of source code.
- Plan for architecture of SOA and SPA applications.
- Implement web services and APIs for various implementations of applications ranging from web to mobile.
- Optimize the performance and responsive design.
- Automate development and delivery process.

Web Developer Tech Lead, IBM

Bangalore, India— April 2010 - March 2014

Working as a Tech lead web developer my responsibilities include but not limited to develop rich web applications and project coordination with stakeholders and peer developers.

Highlights and accomplishments

- Project management skills.
- Can work as a team or singular.
- Capability to learn new things rapidly.

REFERENCES

Available on demand

- Develop rich web applications using Dojo, Groovy, Java.
- Project coordination with stakeholders using SCRUM methodology..
- Implement latest IBM design guidelines and adhere to it.
- Plan for architecture of SOA and SPA applications.
- Implement web services and APIs for various implementations of applications ranging from web to mobile.
- Timely delivery without any single escalation.
- Self initiative to build tools and applications using the latest technologies (e.g. Node JS, Mongo DB, Angular JS etc.) and IBM cloud infrastructure.
- Played a key role in migration of web applications to twitter bootstrap like IBM html framework.
- Took many educational and learning initiatives to encourage uses of development best practices and spread knowledge about latest web technologies from within IBM and outside.

Front End and Javascript Web Developer / UX Designer, Sourcebits

Bangalore, Karnataka— October 2006 - March 2010

I was one of the initial recruits in [Sourcebits](#). This organization is known for its innovative and revolutionary pixel perfect approach towards UI and UX.

As a UX expert, front-end and javascript developer my responsibilities included but were not limited to realize web development proposals. Suggesting best possible way to accomplish design and development goals using best cutting edge technology.

Highlights and accomplishments

- Worked on numerous websites and mobile sites. Ranging from jQuery, XML, JSON, Flex based to PHP and ruby powered websites.
- I developed one of the initial showcases of HTML5 capabilities [Cart 543](#).
- One of flex applications [Tangled Decals](#) led by me is

featured in [SmashingMagazine](#).

- Adapted wordpress to create many non-blog websites when it was not mainstream to do so.
- I was one of early adopters of jQuery in 2007.
- Introduced web development guidelines and best practices.
- Introduced uses of CSS preprocessor SASS & Compass.
